## LUCERO RESOURCE CORP.

[LCR-V] 6,206,566 SHS.

PRELIMINARY WOLF PROJECT ASSAYS - Jonathan W. George,  
vice president,  
reports Lucero Resource Corp. has been informed by Metall Mining  
Corp. of the following developments on the Wolf gold project 130  
miles southwest of Prince George, B.C. Metall can earn a 75%  
working interest by paying \$200,000 and spending \$3,000,000  
on exploration by 1998. Metall's report states:

"The 1994 drill program on the Wolf epithermal gold project  
was completed by Metall in early August with nine holes drilled to  
test geophysical, biogeochemical and structural targets.  
Preliminary results are as follows:

<u>HOLE</u>	<u>DEPTHM</u>	<u>RESULTS</u>
W-22	199.1	no significant values expected
W-23	283.2	244.1 - 258.8; up to 0.59 g/t Au
W-24	142.3	no significant values expected
W-25	251.8	no significant values expected
W-26	55.2	hole abandoned
W-27	198.7	assays pending
W-28	99.7	fault zone - no significant values expected
W-29	44.5	no significant values expected
W-30	58.5	192 ft casing - hole abandoned
TOTAL	1333.0 metres	

Future work at the Wolf property includes producing an alteration  
map, restoring and mapping a high grade gold showing (78 g/t) to  
identify mineralizing controls, biogeochemical sampling 'up-ice' of  
a significant till anomaly and further evaluation of preferred hosts  
for Ridge Zone mineralization." (SEE GCNL NO.139, 21 Jul94, P.3
