LA ROCK MINING CORP.

[LAR-V] 9,424,120 shs.

VISIBLE GOLD ENCOUNTERED - Dr. Robert E. Lee, president, La Rock Mining Corp., reports more visible gold has been encountered in expansion of the Dave's Pond gold zone on the Brandywine property, 40 km north of Squamish, B.C.

The property is 100%-owned, subject to a 0.5% net smelter return royalty. In the 1994 drilling program, new core assays will automatically combine fire assay and metallics. Reviewing 1993 results, the company found that metallic assay gold increased the gold values up to 50% in some sections of the core. In the current program, three holes are in the process of being logged, split and sent for assay. DP94-23 and DP94-24 have intercepted two zones in each hole, which are well mineralized and contain visible gold. The third hole, DP94-25 is well mineralized over wide intersections and has also intersected the two zones, hosting visible gold, galena, sphalerite and chalcopryrite.

In the opinion of the company's on site geologist, it appears DP94-25 is by far the best hole to date, including the Discovery Hole DP93-4, which returned 74 feet of 0.22 oz.gold/ton. (SEE GCNL NO.21, 1Feb94, P.2 FOR PREVIOUS PROJECT INFORMATION)
