MORE OUTSTANDING GOLD ASSAYS - Dal S. Brynelsen, president,  
reports Pacific Vangold  
Mines Ltd. and 50/50 joint venture partner International Silver  
Ridge Resources Inc. have received further high grade assays from  
underground development on the Iron Colt gold mine at Rossland,  
B.C. SEE TABLE OF ASSAYS OVERLEAF P.1.

The high grade Iron Colt Main vein has been developed along a

length of 100 feet and vertically for 25 feet along several raises.  
The vein is open in all directions and is known to persist from  
surface to at least 300 feet below ground at the haulage level. The  
companies are continuing to open up and develop the Iron Colt Main  
vein, which is open in all directions. The ore is presently being  
tested by two mills for processing (one owned by International  
Silver Ridge). The companies hope that a milling decision can be  
made by the end of July. The companies have now received from the  
Department of Energy, Mines and Petroleum Resources the required  
bulk sampling permit allowing the mining and testing of 10,000  
ton. (SEE GCNL NO.132, 12Jul94, P.4 FOR PREVIOUS PROJECT  
DETAILS)
