## WESTPINE METALS LTD.

[WM-V] 4,865,133 SHS.

EXPLORATION GRANT AWARDED - Willis W. Osborne, CEO, reports Westpine Metals Ltd. has been awarded a grant of \$53,512 from the provincial "Explore B.C. Program" for its copper/gold/molybdenum Taseko property, located 140 miles north of Vancouver, B.C. To receive the full amount of the grant, the company must incur exploration expenditures on the property of at least \$161,000.

A 4,000-foot drilling program is planned for the property in August-September to test a series of copper soil anomalies extending for 8,000 feet west of the Buzzer Zone. Fragments of granitic rock with disseminated chalcopyrite and molybdenite have been traced over a 900 foot length just south of the soil anomalies. Old reports indicate the Buzzer Zone to contain 5,500,000 tons of 0.35% copper and 0.031% molybdenum, with gold occurrences.

In 1988 through 1991, the Empress area, northwest of the above anomalies, was drilled. Drilling to date has defined a mineral reserve at the Empress of 11,000,000 tons of 0.61% copper and 0.023 oz. gold/ton, using a 0.40% copper cut-off (not copper equivalent).
