NEW CANAMIN RESOURCES LTD.

[NNI-V] 8,567,958 shs.

ADDITIONAL ASSAY RESULTS - Alan C. Savage, president
New Canamin has reported further

Huckleberry Main Zone assay results from the 100% owned property
located 70 miles east of Kemano, B.C. Diamond drill holes #91-106
and 107 were drilled from the same locations. These holes constitute a
100 ft. step back from previously released holes #94-104 and 105 in
the direction of the 1993 Main Zone drilling.

<u>HOLE NO.</u>	<u>INTERVAL (FT.)</u>	<u>COPPER %</u>
94-104	22-60	0.599
(-90°)	22-260	.418
	22-400	.402
94-107	50-140	.624
(-60° North)	140-330	.16

(in granodiorite)

This 1994 drilling to the south-west of the limits of the 1992-93
drilling is adding useful tonnages of high-grade near surface
mineralization to Main Zone resources. Drilling is continuing in the
Main Zone with the drill presently on hole No. 94-123. The first East
Zone hole in the 1994 drill program has been completed and visually
carries good copper values. (SEE PREVIOUS RESULTS IN GCNL NO.
43, P.1 3MAR94).
