**HERA RESOURCES INC. (HRR-V)**  
**INTERNATIONAL TAURUS RESOURCES INC. (ITU-V)**  
INFERRED RESERVES REPORTED - David W. Hjerpe, president of  
Hera Resources Inc. and  
International Taurus Resources Inc. reports the recent drilling program  
of 3650 feet in 20 holes has been completed on the International  
Taurus gold deposit near Cassiar, northwest BC. Assay results for the  
first 3 holes have been received.

HOLE NO.	INTERVAL FEET	LENGTH FEET	GOLD OZ/TON
94-1	85-86.3	0.9	26.223
	179.7-187	5.1	.377
	198.5-205	4.6	.781
94-2	211-218	4.9	.277
	37.5-49	8.1	.072
	99-103.7	3.3	.002
94-3	142-146	2.8	.060
	161-168	4.9	.256

The drilling program tested the 93-1 and 93-2 vein systems. On the 93-1 vein, step-out drilling was done at 100 foot sections, and indicated continuity of mineralization for an additional 400 feet of vein strike length.

Fill-in drilling on the 93-2 vein system was completed to confirm previously indicated higher grade intersections in close proximity to existing underground workings.

Hera owns 56% of International Taurus, which owns a 100% interest in 31 claims and has optioned 10 more. (SEE GCNL NO.237, 10DEC93, P.4 FOR PREVIOUS DRILL RESULTS)
