PERCUSSION DRILLING COMPLETED - Egil Livgard, secretary, reports Huldra Silver Inc. has completed a small percussion drilling program on its 100%-owned Treasure Mountain property located 27 km east of Hope, southwest B.C. It was designed to check the bedrock under a large soil anomaly about 800 metres north of the underground workings on the "C" vein. The program consisted of six holes totalling 271 metres, 213 metres of which was in bedrock. This total footage averaged 472 PPM zinc. Hole No.5 averaged 26.8 grams silver/tonne and 878 PPM zinc over its total length of 36 metres.

These anomalous values will be followed up by trenching and by a detailed structural geology study before further drilling is undertaken. (SEE GCNL NO.184, 26Sept94, P.3 FOR PREVIOUS PROJECT INFORMATION)
