## PACIFIC VANGOLD MINES LTD.

[PVM-V] 6,133,675 SHS.

THREE 100% EXPLORATION - Dal S. Brynelsen, president Pacific  
PROGRAMS REVIEWED Vangold Mines has reported the start  
of an extensive diamond drill  
program on certain known anomalies on the 100% portions of the  
15,000 acre mineral claims in the Rossland, B.C. area.

Each of the Gertrude, Evening Star and Georgia claims which are  
to be drilled are 100% owned by Pacific Vangold and are separate  
from the Iron Colt claims which are in a 50 - 50 joint venture with  
**INTERNATIONAL SILVER RIDGE RESOURCES INC.**  
[ISG-V] 2,929,306 shs.

Drilling started Oct. 6, 1994, on the Gertrude claim which is  
adjacent to the War Eagle Mine. Historic production from the War  
Eagle Mines is 600,000 oz. gold. This drill hole is planned to  
intersect the War Eagle vein 150 feet down dip from a 1991 drill hole  
that intersected 14 feet of 0.4 oz. gold/ton. The company believes  
this intersection identifies the War Eagle vein which cuts diagonally  
across the Gertrude claim and has significant potential based on  
previous production from the adjacent War Eagle Mine. This hole is  
scheduled for completion October 13, 1994.

On the Evening Star drifting has progressed 350 feet and 150  
feet more drifting is required to access the 100,000 tons of 0.33 oz.  
gold /ton drill proven in previous programs. The company plans  
extensive underground drilling to test the western extension of this  
mineralization where previous drilling discovered 10 feet of 0.8 oz  
gold /ton, 350 feet west of the existing gold vein.

The company will also start underground drilling this fall into  
the Georgia claim, which previous engineering reports have  
theorized that a stock working occurs near the convergence of the  
main Le Roi Vein and the main North Vein.

This \$300,000 exploration program is funded \$210,000 by the  
company and \$90,000 by the Discover B.C. fund from which  
Vangold won the largest award based on merit for exploration  
programs in B.C.

Underground development work is progressing as planned on  
the company's two mines, Evening Star and Iron Colt at Rossland.

The shares of Pacific Vangold have been upgraded to the  
Resource Board by the Vancouver Stock Exchange. (See GCNL  
No.190, P.4, for previous stories)
