GOLDEN HEMLOCK EXPLORATIONS LTD.

[GHE-V] 4,257,843 SHS.

POLYMETALLIC CLAIMS OPTIONED - Robin Forshaw, president, Golden Hemlock Explorations Ltd., reports an agreement has been reached for the option of the Tatsi 1 and 2 mineral claims, Omineca Mining Division, from Angel Jade Mines Ltd. Golden Hemlock can earn a 100% interest in the property by issuing 200,000 shares in four equal installments and by a cash consideration of \$225,000 over three years and a further \$2,000,000 upon the start of commercial production. The agreement provides for a 5% NSR royalty in favor of the vendor which can be bought down to 3% for a further \$2,000,000.

The Tatsi property, comprising 35 units, is located some 60 km south of Smithers, B.C. Preliminary exploration of the property resulted in the discovery of several polymetallic veins containing high grade silver, gold and copper mineralization. In places the main zone exceeds 10 meters in width. Complete assays from channel samples are not yet available and will be released when
