BOOKER GOLD EXPLORATIONS LTD.

[BGE-V] 4,305,060 SHS.

HEARNE HILL DRILLING UPDATE - Hugh Grenfal, president, reports
Booker Gold Explorations Ltd.

has received assay results from DDH 94-4 at the 100%-owned Hearne Hill property located 15 km north of Noranda's Bell Copper Mine and 65 km northeast of Smithers, B.C. A 4% NSR can be bought out for cash or shares. This hole is located 320 feet northeast of all

previous diamond drilling and was drilled at a 60° angle, Azimuth 330°, to a depth of 248 feet. The entire length of the hole is leached argillitic alteration with some visible chalcopyrite. One five-foot section ran 0.475% copper and another 0.02 oz/ton gold. DDH 94-5 was spotted 100 feet ahead of DDH 94-4 and drilled NQ, Azimuth 330°, 45° angled to a depth of 710 feet. The property engineer describes the hole as being well mineralized for its whole length with chalcopyrite. The core has been split and shipped for assay. Drilling continues. (SEE GCNL NO.199, Oct.18/94, P.4 FOR PREVIOUS PROJECT INFORMATION)
