## LYSANDER GOLD CORP.

[LYS-V] 6,809,509 SHS.

DRILL PROGRAM COMPLETED - D.K. Mustard, director, reports Lysander Gold Corp. has completed a drill program at the Lorraine property near Germansen Landing north central B.C. Lysander holds an option to acquire a 100% interest in the property from Kennecott. A total of 1,216 meters in 10 holes of BDBGM wireline (41.75 mm diam) was drilled. Seven holes tested the Bishop (Extension) Zone for continuity and three holes were drilled to test the feasibility of drilling the Upper Main Zone on the steep south west face of Lorraine Mountain.

Chalcopyrite and bornite were observed in the core which has been shipped to Vancouver for splitting and assaying.

An agreement has been signed with Richard Haslinger and Larry Hewitt to option their five Boot & Steele claim blocks that surround the Lorraine option to the south, east and west.

Drilling has started on the 100%-owned Cat property located 15 km north of Lorraine. Four holes, totalling 400 metres, will test continuity of the magnetite-quartz, gold-bearing, vein system that was intersected in earlier drilling by Lysander and BP Minerals on, and adjacent to, the BET No.1 claim. (SEE GCNL NO.184, 26Sept94, P.3 FOR PREVIOUS PROJECT INFORMATION)
