## AGC AMERICAS GOLD CORP.

[AGA-V] 4,735,369 SHS.

MORE TOODOGGONE ASSAYS - Henry Meyer, president, AGC Americas Gold Corp., has reported the preliminary results for two additional holes on the Finn Zone at its 100%-owned JD Claims, located in the Toodoggone area some 200 miles north of Smithers, northern B.C.

HOLE NO.	INTERVAL (FT.)	LENGTH (FT.)	GOLD OZ/T
94-15	62-97 AND 112-132	35  20	0.193  .373
94-16	62-77 AND 102-122	15  20	.132  .320

Results to date appears to be indicating two parallel zones dipping at shallow angles to the north with the lower or footwall zone, having higher grades. This is in general agreement with holes 94-17 and 94-18 which, while not featuring distinct upper and lower zones, did contain higher grades at the bottom of each mineralized interval. Hole 94-18, previously reported as the discovery hole, is 200 feet to the east and contained 29 feet grading 0.385 oz.gold/ton.

What appears to be emerging is a near-surface, shallowly-dipping zone, possibly a detachment of the low angle fault, with appreciable gold values over significant intervals. Results from the recent Phase II drilling are expected over the next two weeks and should give information on the down-dip character and possible plunge for the overall zone.

The company has acquired by way of staking a further 32 units to the east of the Finn Zone in the apparent direction of the structural trend. (SEE GCNL NO.29, 181, 21Sept94, P.2 FOR PREVIOUS PROJECT INFORMATION)
