AGC AMERICAS GOLD CORP.

[AGC-V] 5,855,369 SHS.

MORE TOODOGGONE ASSAYS - Henry Meyer, president, AGC Americas Gold Corp., has reported preliminary results for three more holes on the 100%-owned JD property in the Toodoggone area, northern B.C. Diamond drill holes 94-25, 94-26, and 94-27 represent a 100 and 150-foot easterly step-out from hole 94-22, which reported grade of 0.385 oz. gold/ton over 27 feet.

HOLE NO.	SAMPLE INTERVAL (FT)	LENGTH (FT)	GOLD OZ/T
94-25	80-85	5	0.29
94-26	80-82	2	.138
94-27	67-77	10	.143

These holes demonstrate the structure intersected in the Finn zone discovery hole continues which enhances the potential for developing significant tonnage within the zone. The results reflect what is believed to be the eastern margin of this mineralized shoot. The structure will be further explored to the east beyond this apparent lower grade zone as anomalous gold soil geochemistry values indicate the structure is gold-bearing further to the east. Results from the remaining five holes of the phase II drilling program, which represent westerly step-outs from discovery hole 94-18, will be released when received. (SEE GCNL NO.196, Oct.13/94, P.2 FOR PREVIOUS DRILL RESULTS)
