EXPLORATION UNDERWAY the J.D. Claim Group Toodoggone
River, 200 miles north of Smithers,

B.C. consisting of soil geochemistry, detailed mapping, I.P.
geophysics and diamond drilling is continuing on scheduled. A grid
totalling 100 line km is nearing completion as is the geochemical
sampling and geological mapping.

A diamond drill machine is on the proptry to start a 5000 ft. 25
hole drill program. This program will investigate the grade within
the fault and footwall. The 1984 drill program on the Gumbo zone
returned an intersection of 15.5 feet (4.72 metres) grading 1.4 oz/ton
(44.8 gm) gold. This area has been targeted for drilling.

An extension to the west from the Schmidt zone, located this
season, is presently awaiting soil and rock analytical results from
the assay lab.

Upon completion of the drilling on the Gumbo zone the drill
will be moved to the Finn zone to test at depth a structure with a
minimum strike length of 100 meters (330 feet) and an average width
of 13 meters (42.90 feet). Samples along this structure returned
assays of 0.57 oz/ton (18.3 gm) gold across 39.60 feet (12.0
meters); 0.24 oz/ton (7.7 gms) gold across 59.40 feet (18.0 meters).
