COPPER SHOWINGS DISCOVERED - William J. Coulter, director,
Atna Resources Ltd.,
reports encouraging results from its current exploration program on
the 100%-owned Ecstall polymetallic property (subject to 3% NSR)
located 72 km southeast of Prince Rupert, B.C. Disseminated copper
mineralization has been discovered over a large zone in the Thirteen
Creek area. As a result, 172 claim units (4,300 acres/16 square
miles) have been acquired by staking. Atna crews are currently
mapping and chip sampling this new mineralization in preparation
for the start of a drilling program in late September. (SEE GCNL
NO.152, 10Aug94, P.3 FOR PREVIOUS PROJECT DATA/MAP)
