CREWS REACH BATTLE ZONE - Bruce McKnight, vice president, corporate affairs, Westmin Resources Ltd., reports development crews advancing on 18 Level from the H-W Mine, part of the Myra Falls mining operations on Vancouver Island, B.C., have now accessed the first of the Battle Zone mineralized lenses. A single face of high grade zinc-rich ore is now exposed in the Gopher Lens on the southern edge of the Battle Zone. This lens will be the first Battle Zone area ore to be mined and development ore from it will be reaching the mill later this month.

In a separate program, underground exploration drilling from the Lynx Mine into the North Down Drop region, north of the Gap orebody has encountered mineralized H-W stratigraphy at an elevation above the main haulage level of the mine. The discovery significantly enhances the exploration potential of the northern half of the Myra Falls property. (SEE GCNL NO.67, 5Apr95, P.2 FOR OTHER PROJECT INFORMATION)
