LORRAINE PROJECT DRILLING UNDERWAY - Stephen Sopher,  
p r e s i d e n t,

Lysander Gold Corp., reports drilling has begun on the 100%-owned Lorraine property, located north of Germansen Landing, B.C. Six of eight drill platforms have been established on the steep southeast facing slope of Lorraine Mountain. To date, a total of 4,409 feet of diamond drilling has been completed in 12 holes. L95-8 was a continuation of L94-8 which contained 302 feet grading 1.49% copper and 0.019 oz.gold/ton.

L95-8, 11 and 12 were drilled from platform No.1. L95-13, 14, 15 and 16 were drilled from platform No.2 about 300 feet to the northeast of platform No.1. L95-17, 18, 19 and 20 were drilled from platform No.4, at 300 feet south-east of platform No.2 and L95-21 was drilled from platform No.6 at 200 feet south-west of platform No.4.

Drilling continues and drill core for assay has begun to arrive at Acme Laboratories. Three samples from L95-8 from 302-332 feet gave an average of 0.98% copper and 0.01 oz/t gold. Mineralization is visible in the continuation of this hole and in all additional holes to date. More assays are awaited. (SEE GCNL NO.129, 6Jul95, P.1 FOR PASSAGEM GOLD PROJECT INFORMATION)
