HEMLO GOLD MINES INC 96.217,688 SHS.

DRILL HOLE ASSAYS AWAITED - Athlone Resources Ltd., 25%, and

75%, have reported Hemio Gold FROM JOHANSON LAKE

Mines Inc. has begun drilling on the Soup claims located in the

Johanson Lake area of 120 km north of Takla Landing, 230 km north of Smithers, B.C. Hemlo Gold may earn a 51% interest in the Soup claims by spending \$1,500,000 in exploration and paying to Athlone and Vital \$150,000. Currently, Hemlo is entering the second year of this project.

Hemlo has two holes planned to test for gold mineralization. The first hole is to be drilled on coincident talus fine (>300 pph gold) and ground magnetic anomalies in an area of quartz-magnetite stockwork which has returned surface values of 5,000 and 8,500 pph gold updip from DDH-89-2. Hole DDH-89-2 intersected gold mineralization grading 5.4 grams per tonne across a drill length of 40 metres and ended in mineralization grading 2.5 grams gold/tonne.

The second hole is to test an area with coincident talus fine and ground magnetic anomalies 350 meters northwest of the first.

Directors of Athlone Resources are: Paul S. Reynolds. Michael H. Sanguinetti, James R. Bartlett, James G.G. Watt and Frederick L. Wynne. (SEE GCNL NO.128, 5Jul95, P.3 FOR ATHLONE LABRADOR PROJECT INFORMATION)
