## AGC AMERICAS GOLD CORP.

[AGA-V] 7,311,369 SHS.

FURTHER TOODOGGONE ASSAYS RECEIVED - Don McWilliams,  
 director, reports

AGC Americas Gold Corp. has received more assay results from its  
 drilling program on the 100%-owned JD gold/silver property located  
 on the Toodoggone plateau about 300 km north of Smithers, B.C.

These step-out drill holes are to confirm the continuity and  
 consistency of the zone. From indications to date, it would appear  
 the drilling has encountered a potentially significant body in the  
 Finn Zone. Drilling to date has covered only a small portion of this  
 epithermal system. Additional drill assay results from the second  
 drill on the Schmitt Zone are expected to be released in the next few  
 days.

Holes JD 95-48 and 95-49 were drilled on a 180° azimuth along  
 a north-south section 30 metres west of holes 94-15 and 94-16, the  
 western most holes drilled on the Finn Zone in 1994. Holes JD95-  
 50 to 95-54 inclusive were drilled along a similar section an  
 additional 30 metres west. Silver and base metal assays for the  
 foregoing drill holes are expected in the near future. (SEE GCNL
