## AGC AMERICAS GOLD CORP.

[AGA-V] 8,440,627 SHS.

MORE TOODOGGONE ASSAYS RECEIVED - Henry Meyer,  
 president.

reports AGC Americas Gold Corp. has received more drill results from its 100%-owned JD gold/silver property located on the Toodoggone plateau about 300 km north of Smithers, B.C. Holes JD95-63 through -67, drilled on a north-south section 100 feet west of the western limits of 1994 drilling, demonstrate (with the exception of hole JD95-66) good continuity of the Finn Zone in a southwesterly direction. Significant results from these recent holes include the following:

HOLE NO.	INTERVAL FEET	LENGTH FEET	GOLD OZ/T	SILVER OZ/T
JD95-63	124.7-158.3	33.6	0.207	1.23
(THIS INTERVAL ALSO CONTAINS 1.08% LEAD AND 1.68% ZINC WITH HIGHER GRADES FOR BOTH, WITH UP TO 4.43% AND 6.92% RESPECTIVELY IN THE FIRST 8.2 FEET OF THIS SECTION)				
(INCL. JD95-64)	148.8-158.3	9.5	0.530	-
	90.2-08.2	18.0	0.318	1.92
	118.1-131.0	12.9	0.414	-
JD95-65	75.5-78.8	3.3	0.122	-
JD95-66	NO SIGNIFICANT VALUES			
JD95-67	113.2-155.9	42.7	0.108	-
(INCL. JD95-68)	116.5-123.1	6.6	0.238	-

Three holes on the easternmost section 9 + 10 W (JD94-20 - 0.280 oz. gold/ton over 4 feet; JD95-62 - 0.348 oz/ton over 34.9 feet, including 1.306 oz/ton over 6.6 feet; JD95-55 - 0.115 oz/ton over 3.5 feet) indicate the zone continues to the east, but part of it may be fault offset. Adjacent step-out holes JD95-56, -57, -59, -60 and -61, drilled for structure, contained no significant gold values. JD95-83, drilled 100 metres east of section 9 + 10 W, intersected mineralization similar to the Finn Zone. Further drilling will test this zone which indicates it may be open to the east and depth. Significant results from these recent holes include the following:

HOLE NO.	INTERVAL FEET	LENGTH FEET	GOLD OZ/T	SILVER OZ/T
JD95-55	48.0-51.5	3.5	0.115	-
JD95-62	46.0-80.9	34.9	0.348	-
(INCL. JD95-63)	59.1-65.7	6.6	1.306	-

(SEE GCNL NO.153, 10Aug95, P.3 FOR PREVIOUS JD PROJECT DRILL RESULTS)
