MORE GOOD GOLD VALUES REPORTED - Henry Meyer, president, AGC Americas Gold Corp., reports the surface mapping program at the 100%-owned JD gold/silver property located in the Toodoggone River plateau 300 km north of Smithers, B.C. has returned two rock samples grading 0.527 and 1.852 oz. gold/ton. The helicopter-moveable drill is targeting this area at a 20-metre depth. Surface rock samples have been collected from the Creek, Woof and Schmitt geochemical anomalies, which represent a step-out along the soil geochemical linear of about one km.

In another development, the Province of B.C. has issued the company a grant of \$36,512 to assist in the 1995 exploration program under the Explore B.C. Program. (SEE GCNL NO.144, 27Jul95, P.2 FOR PREVIOUS TOODOGGONE PROJECT DETAILS)
