**KENRICH MINING CORP.**

[KRC-V] 18,086,228 SHS.

MINERALIZATION EXTENDED - Ken Trociuk, chairman. Kenrich Mining Corp., reports on exploration work at the 100%-owned, subject to 3% net profits interest, 83,000-acre Corey property located in the Eskay Creek region about 30 km north of Stewart, northwest B.C.

The T.V. alteration zone has now been traced on surface for about 1.5 km along strike and across 130 metres of width. Disseminated mineralization is evident on surface and consists of pyrrhotite, pyrite, sphalerite (zinc) and tetrahedrite, an important ore of copper and silver. Newly discovered outcrops have been sampled and submitted for assay on a high priority basis.

Work has also begun on the bench and Battlement Zones. Both zones and the T.V. Zone will be diamond drilled this season. (SEE GCNL NO.125, 29Jun95, P.4 FOR PREVIOUS COREY PROJECT INFORMATION)
