BLACKDOME EXPLORATION REPORT - Richard D. Somerville,
director, Claimstaker

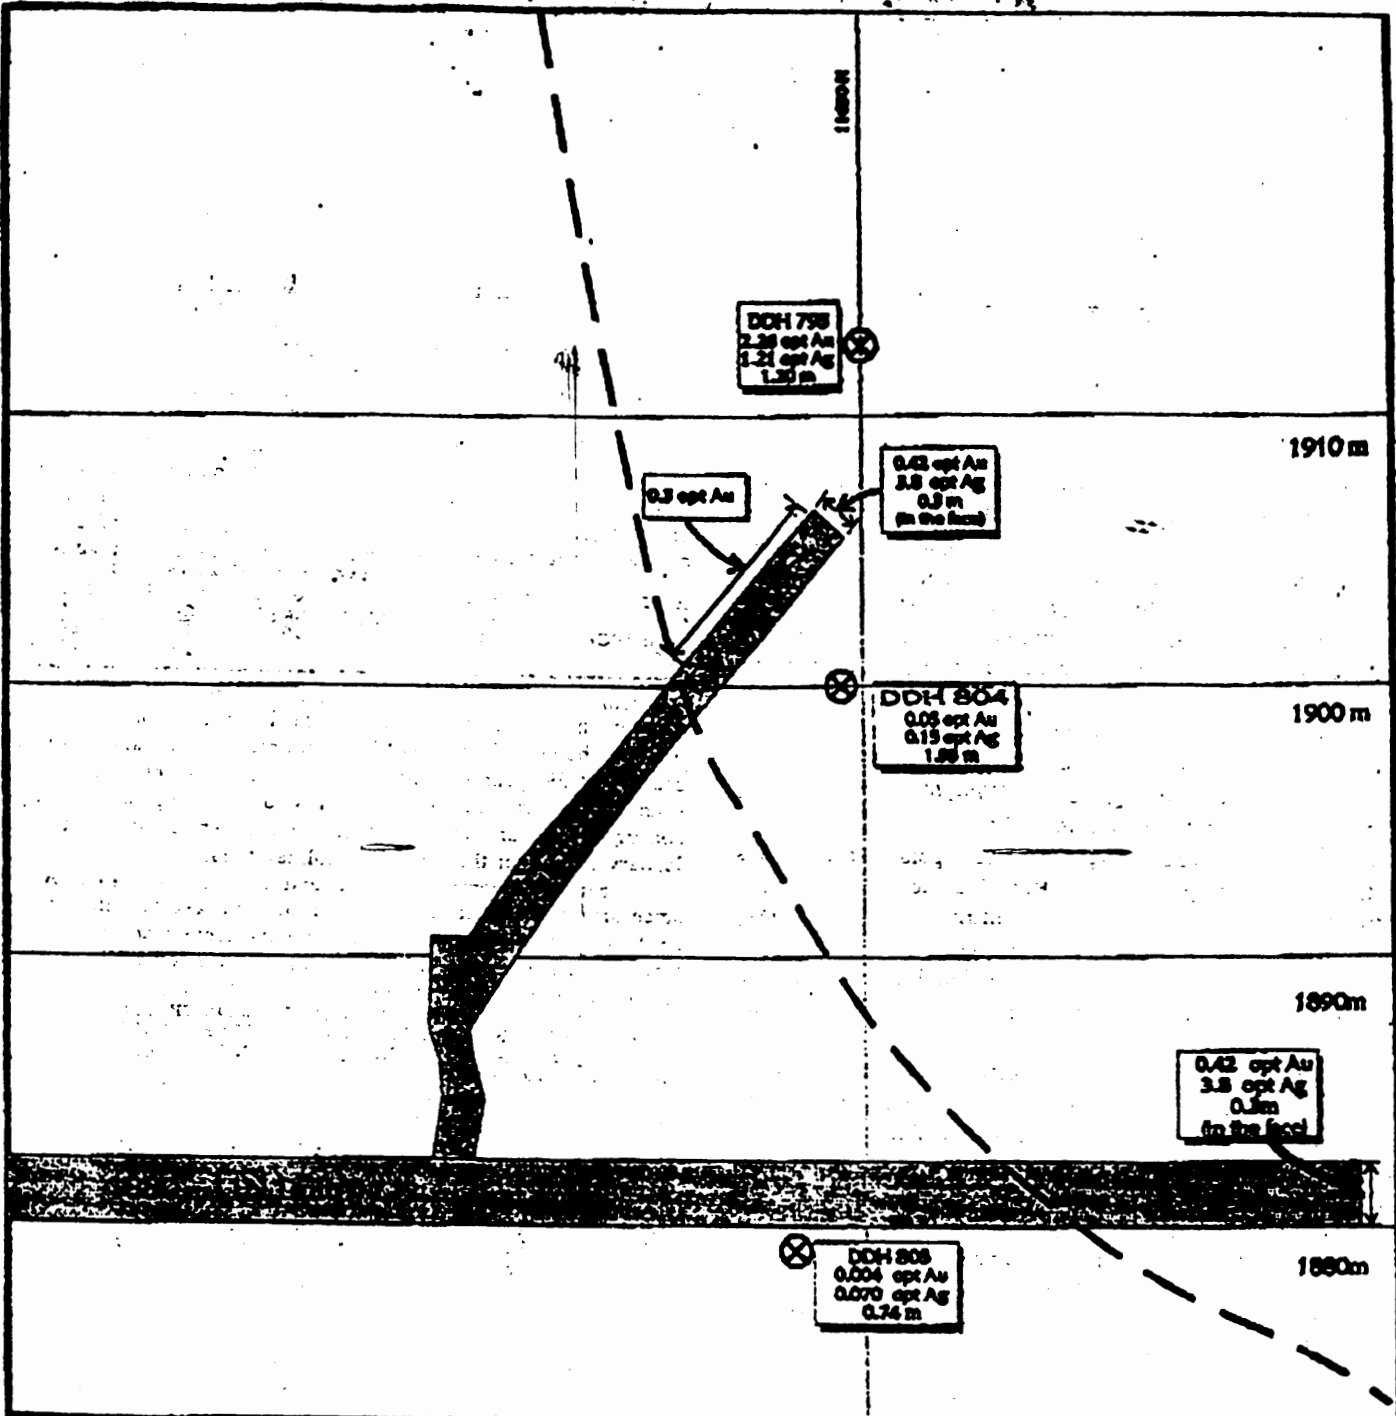

Resources Ltd., reports results of the 1995 exploration program at
the Blackdome Mine project located 70 km west of Clinton, B.C.

SEE MAP OVERLEAF P.1. Under an option agreement, Aurizon
Mines Ltd. can earn a 50% interest by paying Claimstaker \$450,000
by 15Jul96 and completing a \$2,050,000 work program on the
property by 15Jul97. To date, \$150,000 in payments have been
made and in excess of \$700,000 in work completed on the property.

An underground program was initiated to explore and develop
the No.11 vein system. A 78-foot (23.8 m) crosscut was driven to
intersect the vein and 180 feet (54.7 m) of drifting to the north
exposed three sub-parallel braided epithermal veins occupying a
width of about one to 1.5 metres. Just before work was halted owing
to the onset of winter weather conditions, an ore shoot was
encountered, the vein in the last exposed face assaying 14.2 grams
gold/tonne (0.42 oz/ton) and 130 grams silver/tonne (3.8 oz/ton)
over 0.3 metres width.
