AGC AMERICAS GOLD CORP.

[AGA-V] 8,842,227 SHS.

NEW GROUND RETURNS GOOD ASSAYS - Henry Meyer, president, reports AGC Americas Gold Corp. is compiling and interpreting the data acquired during the 1995 exploration program conducted on the 100%-owned JD property located in the Toodoggone region 300 km north of Smithers, B.C. In 1995 the company acquired additional ground contiguous to the eastern boundary to protect the possible eastern extension of the Finn zone. This area is comprised of about 14 square miles, which brings the total area owned by AGC to about 44 square miles.

An initial prospecting team was sent out to evaluate the mineral potential and to take rock samples on this newly acquired ground.

Sample No. 95-ST-13 from the Spur claim returned 0.421 oz. gold/ton and 20.73 oz. silver/ton. Sample No. 95-GB-8 from the Furry claim returned 0.541 oz. gold/ton and 4.18 oz. silver/ton. An additional four samples returned copper value greater than 1% and up to 4.88% copper. This property is located about two miles northeast of the Finn zone.

These high grade samples indicate a newly discovered mineralizing system. This new ground will be evaluated in 1996. (SEE GCNL NO.207, Oct.27/95, P.3 FOR PREVIOUS JD DRILL RESULTS)
