GALAXY ORE PROCESSING CONSIDERED - James T. Gillis,
p r e s i d e n t ,
reports Getchell Resources Inc. is examining options to use systems
for on-site processing of its Galaxy property ore. The 100%-owned
Galaxy property is located 1.5 km north of Teck Corp.'s Ajax mine,
near Kamloops, south-central B.C. Getchells's examination is one
alternative to selling the Galaxy property to a major mining entity
the company now is considering.

Management is discussing various process alternatives with
consultants. Changes to technology now make on-site processing

of the Galaxy ore potentially viable. The Galaxy property has been
developed by Getchell over several years and hosts an estimated
3,500,000 tons grading 0.65% copper with some gold. (SEE GCNL
