CANMARK INTERNATIONAL RESOURCES INC.

[CNM-V] 4,314,084 SHS.

BULK SAMPLE PERMIT GRANTED - Christopher Lee, president, reports Canmark International Resources Inc. has received a bulk sample permit from the Province of B.C. The permit will allow the company to mine a sample of up to 10,000 tons of zeolite from its Sun claims located near Princeton, southwest B.C. At present, the zeolite is being tested by a number of potentially interested parties, with positive preliminary results. Additional testing by interested parties will be conducted starting in mid-January.

Zeolite is a generic term for a group of hydrous aluminosilicates. Canmark's zeolite is known as clinoptilolite which has the ability to absorb liquids and odours. It is used for gardening, stockfeeds, aquaculture, sewage treatment, water filtration and "Kitty Litter." Canmark is seeking to develop new markets.

At Canmark's annual meeting held 16Dec94, the number of directors was set at five. The following individuals were reappointed as directors: Christopher Lee, Sabina Boroevich, Jack Basford, Leonard Doucette and W.Roy Wellman, Q.C. (SEE GCNL NO.173, 9Sept94, P.2 FOR PREVIOUS PROJECT INFORMATION)
