## CLAIMSTAKER RESOURCES LTD.

[CLN-V, ALBERTA] 5,894,121 SHS.

BONAPARTE DRILLING RESULTS RECEIVED - Richard D.  
Somerville,

CEO, reports Claimstaker Resources Ltd. has received assay results  
from its 1994 diamond drilling program on the 100%-optioned  
Bonaparte gold property 40 km northwest of Kamloops, B.C. SEE

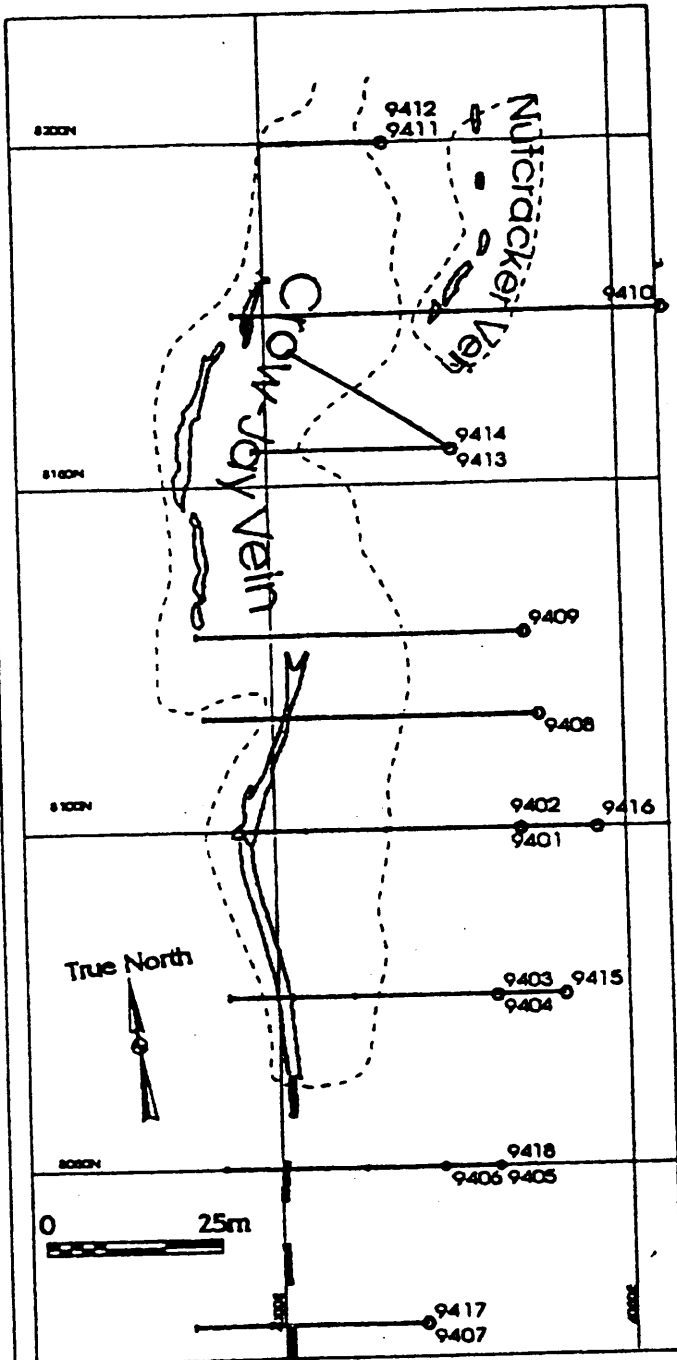

DRILL HOLE MAP AND ASSAY TABLE OVERLEAF P.1. Eighteen  
shallow holes were drilled on the Crow-Jay vein for a total of 973  
metres (3,193 feet). All of the holes intersected quartz veins. Six  
holes had significant gold values as shown in the table. Hole  
No.9412, which graded 2.06 oz.gold/ton over 3.67 feet, is the most  
northerly intersection in this vein to date. There have been six  
veins located on the property, but only the Crow-Jay has had  
significant exploration. Further work is planned on these structures.

Under last summer's bulk sample program, about 4,000 tons of

high grade siliceous ore grading 0.75 oz.gold/ton was shipped to  
Cominco's smelter at Trail, B.C. (SEE GCNL NO.205, Oct.26/94,  
P.2 FOR PREVIOUS PROJECT INFORMATION)
