**CACHE CREEK CLAIMS ACQUIRED** - Irvin Eisler, president,  
reports GWR Resources

Inc. has acquired a block of claims about 20 km east of Cache Creek in the Kamloops Mining Division, B.C. The terms of the agreement is payment of \$40,000 to the prospector over three years and a NSR capped at \$600,000, for a 100% interest in the claims. There is a two-km area of interest around the claims which has now been staked on behalf of GWR. There has not been much work done on the claims over the years except for some induced polarization survey work done in 1972, some geophysical, geological and geochemical work done between 1973 and 1985. In 1994, some rock samples from two trenches on the property were sent in for assaying and returned values as high as 1.02% copper, 14 grams silver/tonne, 0.16 grams gold/tonne and 1.58% zinc. GWR intends to conduct an IP survey prior to drilling this summer.

The company has also staked two claims in the Lac La Hache area, Cariboo region, B.C., east of its Peach Lake property. The claims are not subject to the joint venture agreement with Regional Resources Ltd, but are 100% owned by GWR.
