ECSTALL MINING CORP. [EAM-V] 4,403,000 SHS. INMET MINING CORP.

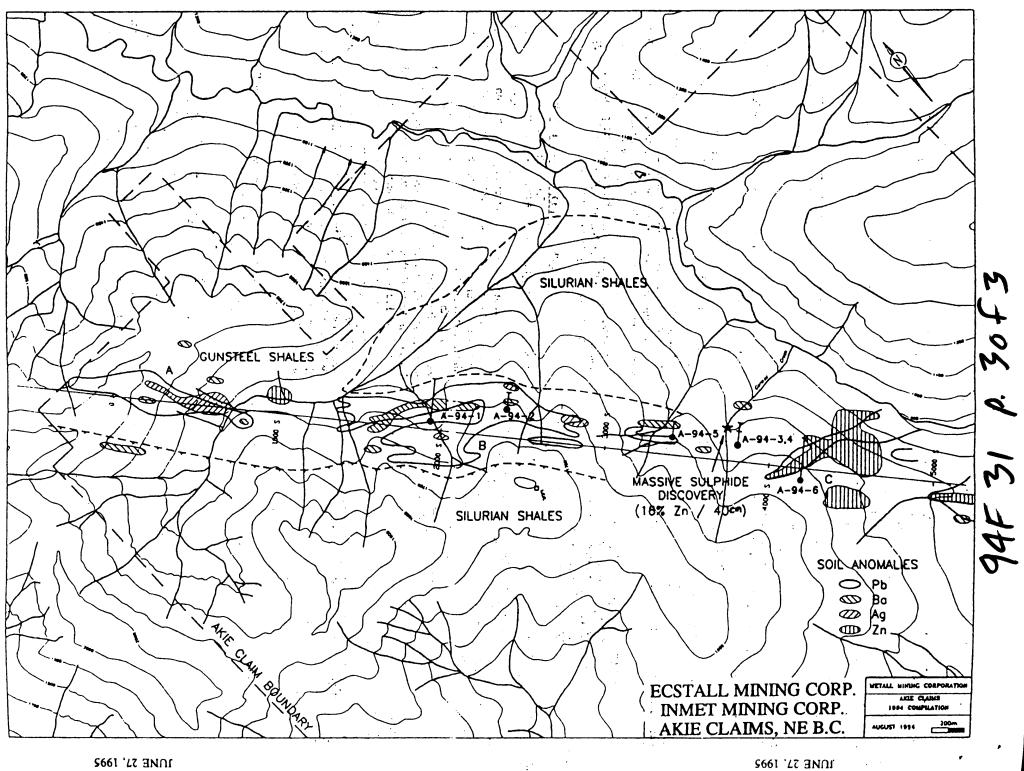

[IMN-T] 81,207,383 SHS. AKIE DRILLING CONTINUES - Chris Graf, president, reports Ecstall Mining Corp. has been notified by

its Akie project partner, Inmet Mining Corp., that diamond drill hole A-95-13 was started June 20 and is now deeper than 127 meters. The planned depth of this drill hole is about 800 metres. The Akie property is located in the Kechika Trough zinc district of northeast B.C. SEE MAPS OVERLEAF PAGES 1 & 2. Inmet will carry out a drilling program of 4,000 to 6,500 metres costing \$1,100,000 to \$1,800,000 to further explore the large Akie zinc/lead/silver/barite massive sulphide deposit discovered in 1994. This 1995 diamond drilling will test the deposit to greater depths and fill in sections between last year's widely-spaced holes.

Inmet holds an option to earn a 60% interest in the Akie property from Ecstall. The 1994 drill program of \$1,000,000 outlined a continuous zone of bedded massive sulphide mineralization along a strike length of 1.4 km and over a dip length of 300 metres, open to depth. (SEE GCNL NO.113, 13Jun95, P.3 FOR PREVIOUS AKIE PROJECT INFORMATION)
