BULK SAMPLING CANCELLED - Donald A. McLeod, president, Tenajon Resources Corp., reports the SB joint venture (50/50 Tenajon/Westmin Resources Ltd.) has decided not to proceed with a bulk sampling program on the KWK zone at the SB property near Stewart, northwest B.C. The objective of the program would have been to confirm the grade of the zone which, due to the erratic and sometimes coarse grained nature of the gold, has a large degree of uncertainty associated with it.

Results of an economic evaluation of the known geological reserves suggest bulk underground mining of the KWK Zone is a marginal proposal at current economic conditions based on the grades indicated by diamond drilling.

Although an exploration program is not currently planned, geological targets which have the potential to change the economics of the property will be re-examined. (SEE GCNL NO.102, 29 May 95, P9 FOR OTHER PROJECT INFORMATION)
