BULK SAMPLING UNDERWAY - Hugh G. Ross, president, Winslow
Gold Corp., reports the start of the

pre-production bulk sampling at its Engineer Gold Mine located 30 km south west of Atlin, northwest B.C. The company is currently extracting and milling 350 tons of vein material from stopes on the Engineer and Double Decker veins.

Upon the completion of this pre-production program, the company will be installing tracks and mobilizing track equipment to allow for greater production to achieve the company's goal to mine 5,000 tons during the 1995 operating season.

A further program of exploration of surface veins and dewatering of lower levels at the Engineer vein and sample collection is planned. This phase three program should permit the placement of 30,000 to 50,000 tons of indicated reserves into the proven reserves category.

The company is hopes for anticipate grades of 0.750 ounces of gold per ton. Winslow and its joint venture partner, Ampex Mining. each own an undivided 50% working interest in the mine. (SEE GCNL NO.110. 8Jun95, P.7 FOR LABRADOR DATA)
