## LA ROCK MINING CORPORATION

[LAR-V] 13,397,307 SHS.

BRANDYWINE ASSAYS RECEIVED - Martial H. Levasseur,  
exploration manager,

La Rock Mining Corp., reports drilling results have been received from the Brandywine property, located 30 miles north of Squamish, B.C. and two miles west of Highway 99. The company has a 100% interest subject to a 0.5% net smelter return royalty. Drill hole DP95-5 has intersected encouraging gold values. At 103 to 133 feet, a 30-foot weighted average = 0.64 oz.gold/ton. Within this 30 foot section are the following:

INTERVAL FEET	LENGTH FEET	GOLD OZ/T
103-108	5	1.159
108-118	10	0.025
118-129	11	1.184
129-133	4	0.031

At 203 to 213 feet, a 10-foot weighted average = 0.24 oz. gold/ton. Hole DP95-5 was drilled 200 feet southeast of DP95-5. Hole DP95-6 has now been completed and assay results should be available by month end. Holes DP95-1 to 4 intercepted interesting mineralization, which ran 0.025, 0.03 and 0.075 oz.gold/ton. It appears these four holes have been drilled too far to the northwest and over shot the mineralized zone. (SEE GCNL NO.17, 25Jan95, P3 FOR BOLIVIA PLACER PROJECT INFORMATION)
