## **ECSTALL MINING CORPORATION**

[EAM-V] 4,403,000 SHS.

**GOOD GRADE DRILL HOLE APPEARS - Ecstall Mining Corporation TO BE ON 100%-OWNED CLAIM** president Chris Graf has reported on March 14, 1995 the BC Chief Gold Commissioner dismissed the complaint by Golden Angus Mines Ltd. thereby confirming 100% ownership, by Ecstall Mining of North 1 mineral claim of 8 units, 494 acres. The North 1 claim covers a significant portion of the North Zone, a new gold zone immediately north of the Polaris Taku property of Canarc Resource Corp. Located 50 miles southwest of Atlin, B.C., 60 miles east of Juneau, Alaska. Canarc Resource in Dec. 1994 reported 14 diamond drill holes over a 1,200-foot strike length consistently intersected altered and mineralized shear veins up to 60 feet wide. The new North Zone has a potential strike length over 5,000 feet from 5 ft. to 55 feet in width.

Mr. Graf has reported it appears the best Canarc intersection in PC-94-No.9 of 12.6 feet grading 0.32 ounces of gold per ton is on the North 1 claim of Ecstall Mining Corporation: (SEE GCNL NO.27, 8Feb5, P.3 FOR OTHER INFORMATION)
