LA ROCK MINING CORPORATION

[LAR-V] 13,807,307 SHS.

MORE BRANDYWINE DRILL RESULTS - Martial H. Levasseur, field manager, reports La Rock

Mining Corp. continues to expand the mineralized structure on its 100%-owned (subject 0.5% NSR) Brandywine gold property, 60 km. north of Squamish, B.C. Surprisingly good values obtained from holes DP95-7, 8, 9, 10 and 11, all drilled outside the high grade geological model. This drilling has intercepted interesting value "feeder" zones, with the following results:

HOLE NO.	INTERVAL FEET	LENGTH FEET	GOLD OZ/T
DP95-7	173-178	5.0	0.202
DP95-8	198-203	5.0	.223
DP95-9	23-33	10.0	.026
	28-78	50.0	.011
	163-168	5.0	.010
	222-228	6.0	.013
DP95-10	98-103	5.0	.106
	113-118	5.0	.190
	123-128	5.0	.080
	138-143	5.0	.014
	188-193	5.0	.062
DP95-11	260-263	3.0	.410

All holes drilled at -90°. The zone now has a strike length of

over 350 feet, over 150 feet width and a depth in excess of 275 feet of gold-bearing structure. The zone is open in all directions. Drilling continues. (SEE GCNL NO 97, 19May95.P.5 FOR PREVIOUS PROJECT INFORMATION)
