MORE RAINBOW DRILLING PLANNED - James T. Gillis, president,
Getchell Resources Inc.,

and Teck Corp. report exploration results warrant additional drilling at the Rainbow joint venture located near Teck's Afton mine south of Kamloops, B.C. SEE LOCATION MAP OVERLEAF P.1 & CROSS-SECTION PLUS DRILL HOLE PLAN OVERLEAF P.2. The joint venture (Teck 70% and operator/Getchell 30%) recommends further drilling begin immediately to evaluate a new zone of copper/gold mineralization discovered during the recent phase two drill program.

The new Rainbow No.22 Zone is situated southeast of the Rainbow No.2 Zone separated by a 50-metre wide barren dyke. The newly discovered zone was intersected at depth in DDH R-95-22 and DDH R-95-25. Drill hole R-95-27, the last drill hole in phase two encountered ore grade mineralization up dip from hole R-95-22. The following results have been previously released.

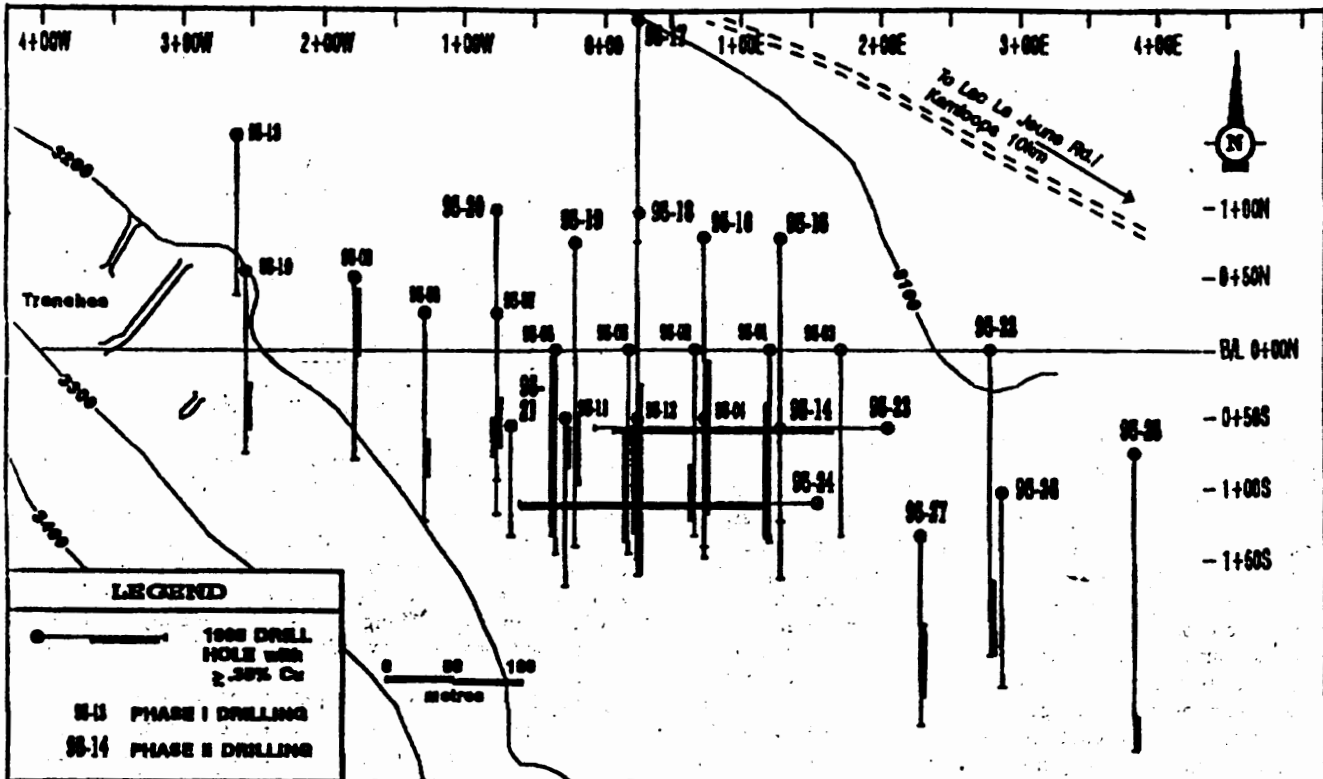

HOLE NO.	INTERVAL		LENGTH METRES	COPPER %	GOLD GR/T	
	R-W	N-S				
R-95-22	2+75E	0+00N	234-300	66	0.88	0.23
INCLUDING			240-291	51	1.03	.26
			273-291	18	1.44	.38
R-95-25	3+75E	0+70S	270-300	30	0.42	.06
R-95-26	2+80E	1+05S	TERMINATED IN A DYKE NO SIGNIFICANT VALUES			
R-95-27	2+25E	1+25S	81.1-153.1	72	0.36	.16
INCLUDING			114.1-144.1	30	0.68	.35

The purpose of the phase three drilling will be to evaluate this new area with a view to adding near surface reserves to the current pit design area of the Rainbow No.2 zone where recent drilling and archival data has outlined a potential resource of 14,100,000 tonnes of 0.5% copper to a depth of 300 metres.

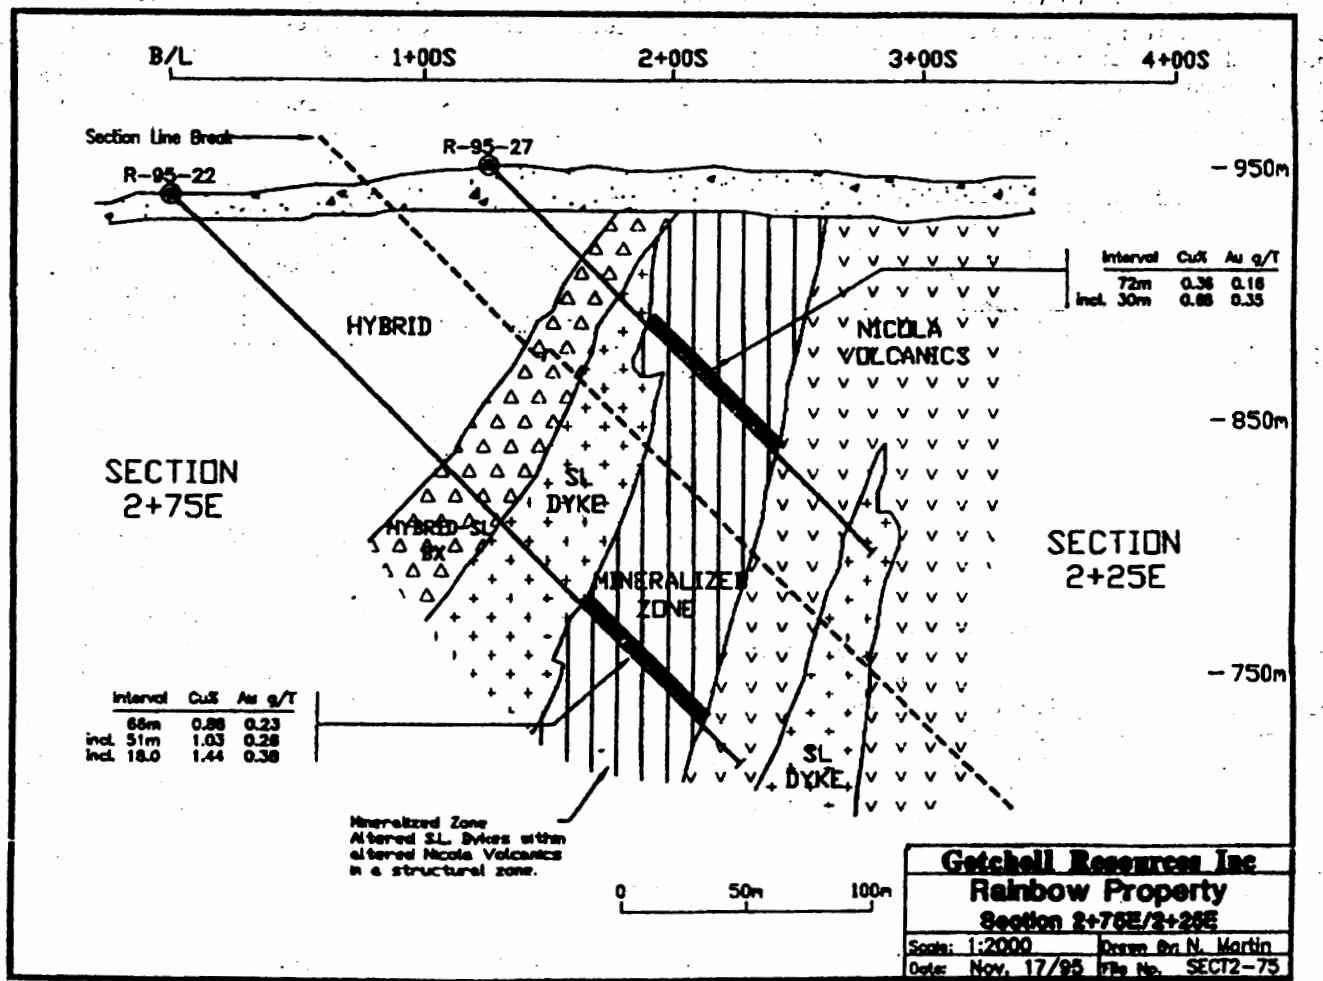

Phase three drilling will comprise about 10 diamond drill holes located primarily in the area immediately southeast of the main deposit. Teck has also suggested some drilling may be targeted at testing the possibility of significant tonnage at depth. Archival drilling has produced grades of 4% to 5% copper below the 300-metre level of the Rainbow Zone and phase two drilling encountered copper/gold at depth indicating a large permissive area in excess of 600 metres strike length. This will be studied prior to drilling.

The 50 claim unit Rainbow claim group is 10 km southwest of Kamloops, within the Iron Mask Batholith. Surface rights are held by Teck as owner of the Sugarloaf Ranch, and the existing Ajax to Afton Mine haulage road traverses the edge of the property. (SEE GCNL NO.204, Oct.24/95, P.1 FOR OTHER RAINBOW PROJECT DATA)
