WESTLEY TECHNOLOGIES LTD.

[WTY-T] 14,601,922 SHS.

SIBOLA PROJECT DRILLING STARTS - Victor J.E. Jones,
president, Westley

Technologies Ltd., reports a drill rig has been mobilized to the optioned Sibola property, to begin a 2,000-foot diamond drill program. The Sibola property, located 70 km south of Houston, B.C. and 20 km north of the Huckleberry copper deposit, hosts porphyry-style copper mineralization in the vicinity of a strong induced polarization anomaly. A previous drill hole from the 1970's returned 0.33% copper over 206 feet. Drilling will test the more intense portion of the geophysical anomaly which was not drilled due to the loss of two percussion drill holes in shallow overburden.

Westley can earn a 55% interest in the Sibola property by

spending \$500,000 on exploration plus \$110,000 in property payments by 1Nov99. Westley may buy the remaining property interest by paying the owners 10% of the outstanding shares of the company at the time of exercise of the buy-out option. There is no NSR. In connection with the above program Westley reports a private placement of 200,000 flow through shares at 20¢ per share for total proceeds of \$40,000. (SEE GCNL NO.217, 10Nov95, P.5 FOR PREVIOUS SIBOLA PROJECT INFORMATION)
