HEARNE HILL DRILLING REPORT - Hugh Grenfal, president,  
Booker Gold

Explorations Ltd., reports results from its 100%-optioned Hearne Hill property 65 km northeast of Smithers, B.C. Diamond drill hole 95-17 was abandoned at 100 feet due to caving. SEE DRILL HOLE MAP OVERLEAF P.1. Diamond drill hole 95-18 was mineralized throughout the 900 feet with an average grade of 0.2% copper, 1 gram silver/tonne and 0.06 grams gold/tonne and remained in a rhyodacite tuff that in places caps the porphyry. One five-foot section of breccia did come through the cap and assayed 0.884% copper, 34.0 grams silver/tonne and 0.45 grams gold/tonne. Diamond drill hole 95-19 was not included in the assays received and will be reported later.

Diamond drill hole 95-20 was a vertical hole and intersected several short sections of breccia averaging 0.4% copper and 0.2 grams gold/tonne. The hole averaged 0.183% copper, 0.863 grams silver/tonne, and 0.085 grams gold/tonne over 900 feet.

Diamond drill hole 95-21 (at a 65° angle) drilled across six breccia zones to the southwest of DDH95-16 (0.75% copper, 0.32 grams gold/tonne over 1,000 ft). The number one breccia zone is considered a part of the vertical zone intersected by DDH95-16. The breccias intersected are expected to be vertical structures within the porphyry copper.

BRECCIA NO. 1 - 67 FT. - 0.703% COPPER, 4.271 GM/T SILVER, 0.318 GM/T GOLD (INCLUDES HIGHS TO 1.2% COPPER, 0.94 GM/T GOLD)  
BRECCIA NO. 2 - 50 FT. - 0.578% COPPER, 3.06 GM/T SILVER, 0.18 GM/T GOLD (INCLUDES HIGHS TO 1.367% COPPER, 0.44 GM/T GOLD)  
BRECCIA NO. 3 - 130 FT. - 0.575% COPPER, 1.91 GM/T SILVER, 0.248 GM/T GOLD (INCLUDES HIGHS TO 1.8% COPPER, 1.2 GM/T GOLD)  
BRECCIA NO. 4 - 45 FT. - 0.405% COPPER, 0.8 GM/T SILVER, 0.161 GM/T GOLD  
BRECCIA NO. 5 - 30 FT. - 0.689% COPPER, 2.69 GM/T SILVER, 0.276 GM/T GOLD (INCLUDES HIGHS OF 1.5% COPPER, 0.42 GM/T GOLD)  
BRECCIA NO. 6 - 20 FT. - 0.47% COPPER, 1.418 GM/T SILVER, 0.237 GM/T GOLD

The new breccia zone extends towards the original Chapman Zone where one hole assayed 2.21% copper, 0.04 oz. gold/ton over a minimum 200 feet of core length. New holes are planned to be drilled in an effort to link the Hearne Hill to the Chapman zone for a potential overall length of 370 metres. The zone appears to be over 150 metres in width and open in all directions. Drilling will continue throughout the winter with a short Christmas break. The current exploration budget exceeds \$3,000,000. (SEE GCNL NO.211, 17Nov95, P.1 FOR DETAILED HEARNE HILL PROJECT REVIEW AND PREVIOUS DRILL RESULTS)
