LYSANDER GOLD CORP.

[LYS-V] 8,452,009 SHS.

MORE ENCOURAGING LORRAINE ASSAYS - Lou Duarte, chairman, Lysander Gold Corp., reports new assays have been received from diamond drilling on Lorraine Mountain, located northwest of Germansen Landing, 150 km north of Fort St. James, central B.C. Holes No. L95-21 through L95-28, are reported in the table below. Assays from Hole No. L95-8 through L95-20 were reported earlier. The best of the most recent intersections was in L95-28 which returned:

253 FT. GRADING 1.18% COPPER PLUS 0.22 GRAMS GOLD/TONNE AND 0.22 OZ. SILVER/TON.

Additional drill hole assays and an evaluation of the 1995 program will be reported as available. The Upper Main showing is at 5,000 feet elevation, in a geological setting similar to Royal Oak's Kemess deposit to the northwest. Lysander has a 100% interest in the property with Kennecott holding an option to back-in to 60% at feasibility if reserves exceed 150,000,000 tonnes grading 0.6% copper equivalent.

HOLE NO.	AZ.	DIP	INTERVAL METRES	LENGTH MT./FT.	COPPER %	GOLD %	OZ/T
