## FOCAL RESOURCES LTD.

[FCJ-ALBERTA] 10,292,879 SHS.

SAWYER PROGRESS REPORT - Chris Abbott, president, Focal Resources Ltd., reports initial results from geologic mapping, soil and rock sampling on the 100%-owned Sawyer Project, a lead-zinc-silver property located near Kimberley, southeast B.C. about 35 km. from the Sullivan Mine.

Geological mapping and sampling of the 500-metre thick highly contorted Horse Thief Creek Beds have identified a zone which is 5 to 15 metres thick and contains high lead, zinc and silver values. Previously sampled Horse Thief Creek float, assayed 2% lead, 12% zinc and 2 oz. silver/ton. Float samples from the most recent program were collected from just downslope of the anomalous zone subcrop and provide possible confirmation of significant mineralization with analysis of 1% lead, 10% zinc, 1 oz. silver/ton and 0.2 oz. gold/ton in a manganese-rich host rock.

Additional follow-up work is underway to delineate, map and analyze this zone. This potential mineralized zone will be sampled from a series of closely-spaced soil and rock locations collected across three zones crossing the mineralized unit. Analytic work will now include gold in addition to the lead-zinc and silver. This program is being administrated by Michael Bapty, P. Eng., of Bapty Research Ltd. of Cranbrook, B.C.

Voisey Bay Update - The airborne EM/magnetometer of Focal's 100%-owned Voisey Bay properties will not be completed this summer because of mechanical breakdown with the contractor's survey equipment. Focal is now proceeding with the placement of ground crews to perform mapping and sampling to identify potential mineralized outcrops in gossaneous zones similar to that identified on nearby properties. Focal's claim blocks are located in the north portion of the main ultramafic intrusive proximal to the Churchill/Nain break near the Canadian States Gas and Cons. Samarkand properties, both of which have provided significant exploration results according to recent reports. (SEE GCNL NO.161, 22Aug95. P.7 FOR NEVADA PROJECT INFORMATION)
