WHITE KNIGHT RESOURCES LTD.

[WKR-V] 8,478,344 SHS.

ICE PROPERTY FARMED OUT - Karl Rollke, president, reports Consolidated Ramrod Gold Corp. has entered an agreement for Anvil Resources Ltd. to acquire up to a 50% interest in certain mineral claims wholly-owned by Ramrod and certain mineral claims jointly owned by Ramrod, White Knight Resources Ltd. and Brimstone Gold Corp. The mineral claims together form a group of 105 claims (181.5 sq. km.) known as the Ice property located west of Elkford, southeast B.C.

Under the terms of the agreement, Anvil agreed to buy a 30% interest in the Ice property by spending \$1,300,000 on exploration by 31May97, \$300,000 of which must be spent by 31May96.

After completing such exploration, Anvil may irrevocably elect to buy a further 20% interest in the Ice property payable by spending a further \$5,000,000 on exploration by 31May98. The operator during the purchase periods will be Ramrod. Upon Anvil completing its purchase, it will enter two joint venture agreements, the first with Ramrod and the second with Ramrod, White Knight and Brimstone Gold. Anvil is required to pay a finder's fee of 50,000 shares.

Work to date on the Ice property has identified five kimberlite pipes. Testing to date has confirmed two of these pipes contain gem quality diamonds. Airborne geophysical surveys indicate these two pipes are about 500 metres long and 250 metres wide, that is, about 31 acres each in surface area. There are indications that there are further undiscovered pipes on the Ice property.

Exploration work in the fall of 1995 will consist of bulk sampling the pipes to test the diamond content. The agreement is subject to regulatory approval. (SEE GCNL NO.155, 14Aug95, P.1 FOR OTHER RAMROD PROJECT INFORMATION)
