RAINBOW DRILLING CONTINUES - James T. Gillis, president, Getchell Resources Inc., (30%,) and joint venture partner Teck Corp., (70% and operator), are continuing with a 3,500-metre (11,500-ft.) Phase II drill program on

~~the Rainbow property, located about 10 km. southwest of Kamloops, B.C. To date, 10 holes (95-14 to 95-23) totalling about 2,600 metres have been completed. Drilling has concentrated on the Rainbow Zone to test an area of previously defined copper mineralization.~~

Analytical results for the 13 holes completed in Phase I were previously released. Complete analytical results for holes 95-14 to 95-23 have not been received. Visible copper mineralization is present in several holes and confirms results of previous drill programs.

Since presentation of results on a hole by hole basis is not particularly meaningful, full analytical results for this phase will be released on a comprehensive basis as soon as possible after completion of the program. Drilling will continue for about 10 days. (SEE GCNL NO.161, 22Aug95, P.4 FOR PREVIOUS RAINBOW PROJECT INFORMATION)
