GOLDEN QUAIL RESOURCES LTD.

[GQR-V; GQRVF-NASDAQ] 15,804,148 SHS.

TATSI DRILLING RESULTS - George W. Heard, president, reports Golden Hemlock Explorations Ltd. and partner Golden Quail Resources Ltd. have received assays from initial drilling on the Main and Discovery Zones on the Tatsi property located near the headwaters of the Zymoets River about 40 miles southwest of Smithers, B.C.

Main Zone: Only one hole of four drilled (DDH 95-2) intersected mineralization similar to that seen on surface. The hole assayed as follows:

INTERVAL METRES	COPPER %	SILVER OZ/T
14.0-14.6	0.99	15.81

Drill holes 1, 3 and 4 drilled between the areas of outcropping mineralization to test continuity did not intersect significant values.

Discovery Zone: A total of 10 holes were drilled on the Discovery Zone. Results from the first five have been received.

HOLE NO.	INTERVAL METRES	LENGTH METRES	GOLD OZ/T	SILVER OZ/T	COPPER %	LEAD %	ZINC %
5	14.9-16.4	1.5	0.1	1.1	1.03	1.78	1.39
6	14.3-15.8	1.5	0.125	0.8	1.26	0.35	0.62
7	17.6-18.6	1.0	0.037	0.45	0.51	0.36	-
8	15.8-17.5	1.7	0.001	0.5	0.36	-	-
9	14.3-15.2	0.9	0.152	0.67	1.65	1.61	1.31
	16.3-16.9	0.6	0.095	1.26	1.21	0.21	0.33

On both zones drilling encountered high temperature alteration at depth which, in the opinion of Golden Hemlock personnel and the company's consultants, may be indicative of close proximity to a significant porphyry system.

Results from the remaining five holes on the Discovery Zone and one additional hole on the Main Zone will be released as they become available.

Golden Hemlock has an option to earn a 100% interest in the property, subject to options by Golden Quail to earn 37%, H&J Resources earning 3% and Windham Resources earning 10%, subject to certain royalties. (SEE GCNL NO.174, 11Sept95, P.4 FOR PREVIOUS TATSI PROJECT INFORMATION)
