FURTHER TOODOGGONE DRILL RESULTS - Henry Meyer, president, AGC Americas

Gold Corp., reports further assays from the 1995 drill program on their 100%-owned JD claims located in the Toodoggone River area about 300 km north of Smithers, north-central B.C. SEE TABLE OF ASSAYS OVERLEAF P.2. The assay results from holes JD95-90 to JD95-96 are significant because they represent a 100-foot (30-metre) step-out westerly from previously reported holes JD95-74 to JD95-89. The results from holes JD95-97 and JD95-98 are more significant as they represent a step-out of 200 feet (60 metres) westerly from previously reported holes JD95-74 to JD95-89.

These drill results further demonstrate the Finn Zone is continuing to develop economic grades over significant mining widths. The 1995 drill program is continuing and further results will be disseminated when available. (SEE GCNL NO.164, 25Aug95, P.2 FOR PREVIOUS JD PROPERTY ASSAY RESULTS)
