ROCK CREEK DRILLING UNDERWAY - Hugh G. Ross, president, reports Winslow Gold

Corp. has begun a diamond drilling program on its Rock Creek gold property located about 18 miles east of Osoyoos and 10 km from Rock Creek, south-central B.C. The program consists of a minimum of 500 metres (1,500 ft) of diamond drilling to duplicate a previous percussion hole drilled in 1993, which intersected a structurally controlled garnet-epidote skarn assaying 0.4 oz. gold/ton over a five-foot intersection. This earlier drilling program intersected significant sulphides relating to an altered transition zone which is approximately 60 feet thick. This third phase multi-hole step out drilling program will also test associated IP geophysical anomalies coincident with strong gold soil anomalies.

The anomalies are adjacent to the main gold-bearing zone located on the Dayton Camp claims which was the main gold producer in the district. The claims are located 16 km northwest of the Crown Jewel project just across the border in Washington State which host a 1,800,000 ounces of gold reserves and is planned to start production in 1997. Winslow currently owns an 85% working interest in the lands with its joint venture partner, Northwind Ventures Ltd. owning a 15% working interest. (SEE GCNL NO.226, 24Nov95, P.5 FOR PREVIOUS ROCK CREEK PROJECT DATA)
