Hole DP96-1 is online with a long section of excellent values
 from the DP Zone, which is believed to connect with the Main
 Showing, 1,000 ft to the southwest.

The balance of the core to 460 feet is well mineralized and
 visually the same as the upper zone. This lower zone is now being
 split and sent for assay in anticipation of similar results as obtained
 from the 153 ft to 193 ft section. Drilling continues and further
 assays will be forthcoming. (SEE GCNL NO.1, 2Jan96, P.3 FOR
