### BOOKER GOLD EXPLORATIONS LTD.

[BGE-V] 6,008,273 SHS.

ANOTHER GOOD HEARNE HILL HOLE - Ms. S. Hallock, director,  
reports Booker Gold

Explorations Ltd. has received assays from drill hole DDH95-26 at  
the 100%-optioned Hearne Hill project 65 km east of Smithers, B.C.  
in the Babine Lake region. This hole is from the Potassic Zone on  
the western edge of the 1995 drill program. The hole was drilled  
away from the coincidental induced polarization chargeability-  
resistivity anomaly. The intercepts are as follows:

HOLE NO.	INTERVAL FEET	LENGTH FEET	COPPER %	GOLD GR/T
DDH95-26	402-475	73	0.366	0.19
INCLUDES	402-407	5	.677	.26
INCLUDES	447-452	5	.545	.23
INCLUDES	457-462	5	.608	.25
	812-877	65	.286	.16
INCLUDES	867.5-872.7	5.2	.79	.48
	919-995	76	.348	.21
INCLUDES	919-924	5	.48	.34

Booker also reports the start of the 1996 exploration program.  
The first crew has been sent to the property to prepare roads and drill  
sites. Drilling is expected to begin shortly with the completion of  
DDH95-32. The program will then move 500 metres to the  
southwest to drill test coincidental IP-geochemical anomalies. The  
targets to be tested are a part of the extensive open ended IP  
anomalies delineated in 1995. (SEE GCNL NO.245, 21Dec95, P.2  
FOR PREVIOUS HEARNE HILL DRILL RESULTS)
