NORTHERN BC EXPLORATION BEGINS - Victor A. Tanaka,
president, reports

Pathfinder Resources Ltd. has started its 1996 exploration program on the RDN property, located 75 miles northwest of Stewart, northwest BC. Pathfinder can earn a 100% interest by issuing 200,000 shares and spending \$500,000 on exploration by 31Dec98. The program consists of geological mapping, prospecting, soil sampling and magnetic/VLF-EM surveying in order to identify drill targets and will continue for several weeks.

During a previous exploration program on the RDN claims, locally derived float assaying 0.34 oz.gold/ton, 1.23 oz.silver/ton and highly anomalous copper, lead and zinc values was found.

The RDN claims are underlain by an accumulation of Jurassic Hazelton rocks, interpreted by company geologists as being a volcanic centre similar to that hosting the Eskay Creek Mine where ore reserves presently being mined contain 4,000,000 ounces of gold and 140,000,000 ounces of silver.
