WHITE HAWK OPTIONS DEBBIE PROPERTY - Andrew Walker, director,
reports White Hawk Ventures Inc. has agreed to earn a 100% interest from Westmin Resources Ltd. in the Debbie property, 1050 zone, located west of the 900 Mineral Creek and Linda Veir zones, also under lease to White Hawk. All of these mineralized zones are within the Debbie-Yellow Mining lease in the Alberni Mining Division, seven km east of Port Alberni, Vancouver Island, BC.

The 1050 Zone is a gold-bearing quartz vein structure similar in character to the 900 Zone. Trenching in 1990 exposed a three to four-metre thick carbonate altered fault zone. Surface grab samples yielded gold grades as high as 89 grams/tonne. Drill hole DN-90-217 intersected 286.3 grams gold/tonne over a 1.7-metre interval within quartz vein material in this fault zone. The property has been inactive since 1990 and it is planned to follow up this drill intersection with additional drill holes. Terms of the option agreement were not disclosed.
