## MENIKA MINING LTD.

[MML-V] 8,247,649 SHS.

RUBY PROJECT UPDATE - Charles Boitard, president, Menika Mining Ltd., provides an update on its 100%-owned 55-unit Ruby Group copper-gold project at the north end of the Sechelt Peninsula, 85 km northwest of Vancouver, BC. A recent geophysical survey (multi-level induced polarization) carried out in the vicinity of the TY Zone has revealed a positive anomaly. The TY Zone showing is a mineralized volcanic breccia where a grab sample taken from this zone returned the following values:

GOLD	SILVER	COPPER
OZ/T	OZ/T	%
0.3	18.2	8.5

The company has decided to test this geophysical anomaly with diamond drilling. The drill should be on the property in a few days. Based on the results of the geophysical instrument, Menika expects to intercept mineralization within 50 metres. (SEE GCNL NO.59, 22Mar96, P.3 FOR PREVIOUS RUBY & OTHER PROJECT DATA)
