STIRRUP CREEK GOLD LTD.

[SGU-V] 4,437,400 SHS.

EXPLORATION OF HIGH GRADE- Larry W. Reaugh, president has
GOLD UNDERWAY reported Stirrup Creek Gold

Ltd. has started excavator
trenching, soil sampling and geological work on the 100% owned
high grade Watson Bar gold project, 33 km. west of Clinton, BC.
The diamond drilling will start June 20, 1996.

A 100-ton sample processed at Silbak Premier Mill near
Stewart, BC returned 1.16 oz/ton gold.

Recent metallurgical testing on a one ton sample averaging
1.87 oz/ ton gold has returned preliminary results as follows:

"A positive indication that much of the gold is free: this initial
test at a very coarse grind of 100% minus 28 mesh produced a
concentrate containing 46.5 oz/ton gold and 44.5 oz/ton silver.
Gold recovery was 68.8%. Further tests at finer grinds are underway
to determine the maximum amount of free gold which can be
recovered by simple means prior to the usual methods involving
flotation and cyanidation. The 100 ton bulk sample through the
cyanide mill circuit at Premier gave an overall recovery of 94%."
